

## Overview

We specialise in the manufacture/supply of a range of CD cabinets that either meet or exceed testing to **BS2881:1989** and the requirements of “**The misuse of drugs (safe custody) regulations 1973**” Whilst meeting the demands of the busy pharmacy, surgery, clinic and care/nursing home. Our range of Controlled Drug cabinets are manufactured to three different specifications: -

### Standard Range

Complemented by carefully designed shelving to maximise storage space which is partly adjustable in some cabinets to allow for the storage of large bottles. These cabinets are powder coated and oven baked in white for a hygienic, tough and long lasting finish.

### Heavy Duty Range

Constructed in 6mm thick steel plate with the doors being recessed into the cabinet with hardened silver steel hinge pins and multi point locking systems. These cabinets are powder coated and oven baked in off white leatherette providing a hygienic, durable and long lasting finish.

### Premium Range

This range of cabinets are constructed in 3mm thick steel plate with the doors being fabricated from 6mm steel strengthened further internally and recessed into the cabinet with a multi point locking system. These cabinets are powder coated and oven baked in white for a hygienic, durable and lasting finish.

\*All cabinets can be fitted with a warning light and/or alarm if specified at time of order, please contact us for more information.

## CD Cabinet Alarm

- Alarmed when it's locked
- Alarmed when it's unlocked
- Adjustable reset alarm timer
- Adjustable alarm sensitivity
- Provision for remote external light
- Will fit most Denward cabinet
- Can be supplied fitted to cabinets

Compatible with all drug cabinets within our range.

Designed for easy installation and specifically for use with our range of controlled drug cabinets this alarm system operates when the cabinet is locked or unlocked.

Once activated a remote external red warning light will display when the cabinet door is unlocked.

After a pre-set time period a warning beep will sound to advise that the door is still open and that it should be locked.

The alarm system includes the provision to be connected to a main burglar alarm system however; this connection should only be made by a qualified alarm engineer.

The alarm is supplied with a 12v mains power adaptor with an installed fail safe option to ensure the alarm is still activated should the mains fail.

## CD Cabinet Warning Light

This system operates when the lock is unlocked and not when the CD Cabinet door is opened.

Battery operated

Mains option available at time of order

High Intensity Flashing LED displayed on the front of the cabinet

Remote flashing LED optional at time of order

**\*Supplied fitted to new cabinets only, please specify at time of order**

## CD Cabinet Alarm Remote Light

High intensity 20mm remote LED for use with the Denward Alarm

To be used in connection with our controlled drug cabinets alarm providing a remote visual aid away from the cabinet giving peace of mind to the user.
